NSE Options · MCX Commodities · Fully Automated

The Problem & Solution

THE PROBLEM

- Manual trading = staring at charts all day
- Emotional decisions = revenge trades, FOMO, panic exits
- Missed setups = can't watch market 24/7
- Inconsistent execution = different decisions every time

THE SOLUTION

- ScalpBot trades automatically — no human needed
- Zero emotions — follows rules every single time
- Covers NSE morning + MCX evening = double the opportunity
- Executes in <1 second (humans take 10-30 seconds)

YOUR DAILY ROUTINE

Morning (2 min):

Open app → Refresh token → Start bots → Close app

Evening:

Check Telegram for alerts → Review P&L → Done

That's it. No charts. No stress. No FOMO.

How It Works — The 6-Step Mechanism

1

MARKET REGIME DETECTION

Classifies market every 5 min: Trending / Ranging / Volatile / Dead. Only activates strategies matching current regime.

2

SIGNAL GENERATION (11 Strategies)

Breakout, Trend, Momentum, VWAP, Supertrend, ORB, Pattern, MACD+BB, Institutional, Failed Breakout, 1-Hour Candle.

3

SMART FILTERS

15-min trend must agree with direction. Bid-ask spread < 5%. Premium > ₹10. Min 55% confidence score. Direction cooldown after losses.

4

OPTION SELECTION

Fetches live option chain. Picks optimal OTM strike. Calculates lot size from capital + risk %.

5

EXECUTION

Order placed in <1 second. Auto stop-loss (ATR-based). Auto target (2:1 or 3:1 R:R). Partial profit booking (50% → 25% → trail rest). 20-min time exit for dead trades.

6

RISK MANAGEMENT (Always On)

Daily loss limit auto-stop. Max trades per day. Portfolio exposure cap. Emergency Kill Switch.

Key Features

TRADING

- ✓ 3 parallel bots running simultaneously
- ✓ NIFTY, BankNifty, FinNifty, Crude, Gold, Silver
- ✓ NSE morning + MCX evening sessions
- ✓ Auto-OTM strike selection
- ✓ Partial profit booking + trailing SL

RISK PROTECTION

- ✓ Daily loss limit auto-stop
- ✓ Direction-aware cooldown
- ✓ Bid-ask spread filter
- ✓ Portfolio exposure cap
- ✓ One-click Kill Switch

MONITORING

- ✓ Telegram alerts (every trade + daily summary)
- ✓ Live dashboard with real-time P&L
- ✓ Strategy scorecard (auto-disables weak strategies)
- ✓ Full trade history with CSV export

TESTING

- ✓ Paper trading mode (zero risk)
- ✓ 6-month backtester on real data
- ✓ Shadow mode (compare before switching)

Performance — Backtest Results

Data: 120 trading days, REAL 1-min Upstox Nifty Futures (Jan-Jul 2026)

Metric	Value
Total Profit	₹87,440
Capital Deployed	₹5,00,000
Return (6 months)	17.5%
Annualized Return	35%
Sharpe Ratio	2.14 (Institutional Grade)
Max Drawdown	8.6%
Win Rate	37.7%
Risk-Reward Ratio	1:2 average
Total Trades	268
Trading Days	120

Why low win rate but high profit?

We cut losses fast and let winners run. Average win is 2× bigger than average loss. This is how institutional quant funds operate — consistency over accuracy.

Markets Supported

NSE MORNING

9:15 AM – 3:30 PM

- NIFTY 50 Options
- BankNifty Options
- FinNifty Options

Disclaimer

Trading in financial markets involves substantial risk of loss. Past performance, including backtested results, does not guarantee future results. The performance metrics shown in this document are based on historical backtesting using real market data and may not reflect actual trading outcomes.

ScalpBot is a trading automation tool, not a financial advisor. It does not provide investment advice, recommendations, or solicitations to buy or sell any financial instruments. All trading decisions executed by the bot are based on pre-programmed algorithms and user-configured parameters.

Only trade with capital you can afford to lose. Options trading carries significant risk, including the potential loss of the entire invested amount. Market conditions can change rapidly and may result in losses exceeding historical drawdown levels.

ScalpBot and its creators are not SEBI-registered investment advisors or research analysts. This product is intended for educational and automation purposes only. Users are solely responsible for their trading decisions and outcomes.

By using ScalpBot, you acknowledge that you understand the risks involved in algorithmic trading and options trading, and that you accept full responsibility for any financial losses incurred.
